Ampoules the same the same of the same of

PARKE, DAVIS BY COMPANY, DETROIT 32, MICHIGAN

For estrogenic therapy THEELIN is offered in ampoule form. Protection of potency and sterility of the original pure crystalline hormone are afforded by this individualized packaging.

THEELIN for Therapy

Climacteric symptoms in varying degrees of intensity may be expected in 80 per cent of women as they enter and pass through phases of the menopause. THEELIN often negates or decreases typical manifestations associated with this condition.

Now available in all sizes:

THEELIN IN OIL — In ampayles of 1 cc. containing 1000, 2000, 5000 and 10,000 international units.

THEELIN AQUEOUS SUSPENSION —In ampoules of 1 cc. containing 20,000 international units.

(Continued on Page 30)

When the diet of 50 generations of rats was improved, it was found that they gained a longer average life span and longer "prime of life" with "increased growth and efficiency, decreased death rate and increased vitality at all ages." Without waiting 50 generations, "the size and health of our young adolescents" and increased longevity amply confirm the fact "that the science of nutrition has made vast strides." For the present generations and those to come, Upjohn provides, and will continue to provide, the finest in vitamins, in forms and dosages to fill the needs of medical and surgical practice.

health and ruggedness is laid. And the

well nourished baby is, in most cases, more resistant to the common ills of infancy. Similac-fed infants are notably well nourished; for Similac provides fat, protein, carbohydrate and minerals, in forms that are physically and metabolically suited to the infant's requirements. Similar dependably nourishes the bottle-fed infant—from birth until weaning.

R DIETETIC LABORATORIES, INC. . COLUMBUS 16, OHIO

A powdered, modified milk product, especially prepared for infant feeding, made from tuberculin tested cow's milk (casein modified) from which part of the butter fat has been removed and to which has been added lactose, cocoanut oil, cocoa butter, corn oil, and olive oil. Each quart of normal dilution Similac contains approximately 400 U.S.P. units of Vitamin D and 2500 U.S.P. units of Vitamin A as a result of the addition of fish liver oil concentrate.

Pyribenzamine

COUNCIL ACCEPTANCE

Pyribenzamine now has been formally accepted by the A.M.A. Council on Pharmacy and Chemistry. A report to the Council on anti-histaminic agents was written by S. M. Feinberg, M.D., in the November 23, 1946 issue of the J.A.M.A. Pyribenzamine was found to be highly effective, and produces relatively few side effects.

FOR YOUR CONVENIENCE—in obtaining sample and literature, we suggest you fill out and mail us the coupon.

Solomon Grundy

There are still too many Solomon Grundys—"born on Monday...died on Saturday"—for despite the gratifying decline in infant mortality, there is still only slight reduction in the number of deaths of infants under one month. To better an infant's chance of survival, the first feedings—and the right formula—can do much to minimize the early hazards to life.

'Dexin' has proved an excellent "first carbohydrate" because of its high dextrin content. It (1) resists fermentation by the usual intestinal organisms; (2) tends to hold gas formation, distention and diarrhea to a minimum, and (3) promotes the formation of soft, flocculent, easily digested curds.

Simply prepared in hot or cold milk, 'Dexin' brand High Dextrin Carbohydrate is well taken and well retained. 'Dexin' does make a difference.

Composition—Dextrins 75% • Maltose 24% • Mineral Ash 0.25% • Moisture 0.75% • Available carbohydrate 99% • 115 calories per ounce • 6 level packed tablespoonfuls equal 1 ounce • Containers of twelve ounces and three pounds • Accepted by the Council on Foods and Nutrition, American Medical Association. 'Dexin' Reg. Trademark

Young's

RECTAL DILATORS

for Constipation

Spastic sphincter muscles, by upsetting parasympathetic nervous function or by production of local lymphatic congestion through trauma, may commonly cause aggravating symptoms not directly traceable to any cause. Routine therapy brings little relief because the basic trouble is not treated.

Young's Rectal Dilators consist of four bakelite dilators, graduated in size and introduced in series as the muscles become accustomed to dilation. If routine modalities fail, prescribe MECHANICAL restoration of muscle tone with Young's Rectal Dilators. Complete literature supplied on request. Never advertised to the laity and sold on physician's prescription only. Adult set of 4 sizes, \$4.75. Children's set of 4 sizes, \$4.50.

By using and recommending Young's Rectal Dilators, mechanical restoration to normal tone is accomplished in spastic sphincter muscles, and a host of related and dependent symptoms are thus alleviated. Normal bowel tone is re-established and undiagnosed symptoms usualy relieved.

F. E. YOUNG and COMPANY

432 EAST 75TH ST.

CHICAGO 19, ILL.

At meal time his renowned judgment deserts him. Eating only the food he likes, a choice of notably limited range, he thrice daily produces a burlesque on proper nutrition. Inevitably, this perennial first-nighter makes his entrance into some physician's reception room—the victim of a self-made, borderline vitamin deficiency. In the same cast, you will find other familiar types. Included in it are the ignorant and indifferent, people "too busy" to eat properly, those on self-imposed and badly balanced reducing diets, excessive smokers, food faddists and alcoholics, to name a few. First thought in such cases is dietary reform, of

course. Along with that, a dependable vitamin supplement may well be in order. When you prescribe an Abbott vitamin product, you are assured that the patient will receive the full vitamin potencies intended. Your pharmacy carries a complete line of Abbott vitamin products in a variety of dosage forms and package sizes, and will be pleased to fill your prescriptions. Abbott Laboratories, North Chicago, Illinois.

Abbott Vitamin Products

Yes, and experience is the best teacher in smoking too!

THE wartime cigarette shortage was a real experience to smokers. Whether they intended to or not, people found themselves smoking many different brands, learning by actual experience the differences in cigarette quality.

The result of all these comparisons was the biggest demand for Camels in history. And today more people are smoking Camels than ever before. But, no matter how great the demand:

We don't tamper with Camel quality. Only choice tobaccos, properly aged, and blended in the time-honored Camel way, are used in Camels.

According to a recent Nationwide survey:

More Doctors smoke Camels

than any other cigarette

1 "Premarin" ... Effective when given by mouth

2 "Premarin" ... Rarely produces unpleasant side reactions

3 "Premarin" ... Highly potent

"Premarin" provides an effective medium for the management of the menopausal patient. Prompt alleviation of distressing symptoms with comparative freedom from untoward effects may usually be anticipated with this conveniently-administered natural estrogen. To these advantages may be added the emotional uplift which is frequently reported following therapy and is invariably described by the patient as a feeling of well-being...therapy with a "plus." The average suggested dosage is 1.25 mg. to 3.75 mg. daily. Once symptoms have subsided, dosage may be gradually reduced to a maintenance level of 0.625 mg. daily or less.

"Premarin" is available as follows:

Tablets of 1.25 mg. in bottles of 20, 100 and 1000.

Tablets of 0.625 mg. in bottles of 100 and 1000.

Liquid containing 0.625 mg. per 4 cc. (one teaspoonful) in bottles of 120 cc.

FREE: HUMAN INTEREST GOOD POSTURE CHART IN full color 18"x24" designed for physicians' offices, clinics and health centers. One in a standard series widely distributed in schools, colleges, industrial plants, "Y's" and similar outlets. Write for your office copy of this educational chart on your professional letterhead to SAMUEL HIGBY CAMP INSTITUTE FOR BETTER POSTURE, EMPIRE STATE BLDG., NEW YORK 1, N. Y.

SAMP NATIONAL POSTURE WEEK MAY 5-10

In its ninth year, National Posture Week continues its sound ethical program of focusing the attention of the country on the significance of Good Posture as an important element in good health and physical fitness.

Distribution of authentic literature through schools, colleges, medical and government bodies; and industrial, professional and civic public health groups is an important part of the program. Physicians, educators and lay groups in the field of public health have shown in practical cooperation and voluminous correspondence that they approve the methods of National Posture Week and its year-round program.

It is our hope that our current campaign will again merit the approval and cooperation of the medical profession.

PAUL EHRLICH, 1854-1915

Research Scientist

FATHER OF MODERN HEMATOLOGY AND CHEMOTHERAPY

Most of our modern medical knowledge of the blood stems from Paul Ehrlich's early work with aniline dyes. Ehrlich applied his dyes to the study of the cellular contents of blood and differentiated the blood picture of pernicious anemia from that of secondary anemia. His more publicized achievements include the discovery of 606, the "magic bullet," and the side-chain theory of immunization. In 1908 he shared the Nobel Prize with Metchnikoff for work on immunology.

THE FACILITIES and effort of the Harrower Laboratory, Inc. are pledged to service of the allied professions of medicine and pharmacy and the best interests of public health.

Specialists in Therapy for

CHRONIC ALCOHOLISM

By the Conditional Reflex and Adjuvant Methods

Obtaining Permanent Abstinence Thru:

METHOD: Since the development of conditioned reflew therapy members of the staff of Shadel Sanitarium have concentrated over 12 years to proving their methods. Treatment is comprehensive and yet compresses a year's therapy into 7 days hospitalization during which patients have the benefit of complete and well developed therapy. This is followed by field rehabilitation and specific recommendations to the family physician. From 1526 cases reported*, 51.5% remained abstinent for more than 4 years.

EXPERIENCE: Over 4000 cases have been treated and invaluable knowledge has been gained in technique, experience, and the use of adjuvant methods. Every member of our staff, dotors to technicians, is a specialist and has achieved this through years of experience and many months of training.

RESEARCH: The research staff has found that the presence of varying physical, environmental and psychiatric abnormalities in many patients necessitates adjuvant methods. Our Research Program constitutes an important part in achieving permanent abstinence, for only through research are past and future improvements possible.

It is the desire of Shadel Sanitarium to cooperate with the family Physician and Psychiatrist to achieve permanent abstinence for the Chronic Alcoholic.

"Brother Rats"

You'd never suspect that these two rats are brothers. One of them is sleek, healthy, intelligent—really a very appealing little fellow. The other one, as you can see, is undersized, not very healthy, and the less said about his coat, the better.

This poor little "Brother Rat" will never know what happened to him, but we know! While his healthy brother grew fat on a perfectly balanced diet, we fed him a diet deficient in Pyridoxine Hydrochloride (Vitamin B₆). When IVC biochemists start building up the unhealthy rat with IVC Pyridoxine Hydrochloride, and finally get him back to normal, ve'll get a double check on the potency of IVC products containing this substance.

Continuous double-checking and even triple-checking account for the size of the IVC "zoo"—and explain why you can depend on every IVC pharmaceutical being true to its label claims. You're playing safe when you prescribe IVC!

IN CONSTIPATION OF PREGNANCY...

"SMOOTHAGE" MANAGEMENT

Pressure on the pelvic bowel by the enlarged uterus and impaired abdominal muscle tone account, to a great extent, for the high incidence of constipation in pregnancy.

Smooth, gentle, normal evacuation—the desired action in pregnancy constipation management—is afforded by the "smoothage" of Metamucil.

By providing soft, plastic, water-retaining bulk, Metamucil promotes normal, easy peristaltic movement.

Metamucil is the highly refined mucilloid of Plantago ovata (50%), a seed of the psyllium group, combined with dextrose (50%), as a dispersing agent.

METAMUCIL

is the registered trademark of G. D. Searle & Co., Chicago 80, Illinois.

IN THE SERVICE OF MEDICINE

Addressed to your women patients

In its current "See Your Doctor" advertisement Parke, Davis & Company emphasizes the importance of seeking medical counsel at the time of menopause. This educational campaign, in behalf of the medical profession, appears regularly in color in LIFE and other leading magazines.

is vitamin-fortified

DEVELOPED by E. V. McCollum, FORMULAC Infant Food is fortified with all the vitamins known to be necessary for adequate infant nutrition. The McCollum procedure of incorporating the vitamins into the milk itself reduces the risk of human error or oversight in supplementary administration.

Formulac is a concentrated milk in liquid form. It contains sufficient vitamins of the B complex, Vitamin C in stabilized form, Vitamin D (800 U.S.P. units), copper, manganese and easily assimilated ferric lactate—rendering it an adequate formula basis both for normal and difficult feeding cases. No carbohydrate has been added to Formulac. It contains only the natural lactose found in cow's milk.

FORMULAC is promoted ethically, to the medical profession alone. It has been tested clinically, and proved satisfactory in promoting normal development and growth. Priced within range even of low-income budgets, FORMULAC is available in drug and grocery stores from coast to coast.

WELL TOLERATED by the NEWBORN

Clinical experience establishes that CARTOSE* is especially well tolerated by newborn infants.

CARTOSE supplies carefully balanced amounts of non-fermentable dextrins, with maltose and dextrose. These offer the advantages of: spaced absorption because of the time required for hydrolysis of the higher sugars; less likelihood of distress due to the presence of excessive amounts of fermentable sugars in the intestinal tract at one time.

CARTOSE is liquid; formula preparation is simple, rapid, and accurate. It is compatible with any formula base: fluid, evaporated, or dried milk.

*The word CARTOSE is a registered trademark of H. W. Kinney and Sons, Inc.

WHEN CHRONIC ILLNESS INCREASES THE NUTRITIONAL NEEDS

Chronic disease, whether febrile or neoplastic, imposes many additional metabolic demands upon the organism. Paradoxically, appetite is apt to wane at this time, making satisfaction of these requirements difficult. In consequence, weakness becomes excessive and the ability to resist secondary infection is impaired.

Because it contains all of the nutrients known to be essential, the dietary supplement made by mixing Ovaltine with milk can play an important role in augmenting the intake of the very nutrients needed. This nutritious food drink provides biologically adequate protein, readily utilized carbohydrate, highly emulsified fat, B complex and other vitamins including ascorbic acid, and the essential minerals iron, calcium, phosphorus. Its delicious taste assures patient cooperation, since it is taken with relish, even when most other foods are refused.

THE WANDER COMPANY, 360 N. MICHIGAN AVE., CHICAGO 1, ILL.

PLANNING · NOT LUCK

Man-Gupan

Planning—not luck—is responsible for the pure, crystal-clear solution of NEO-IOPAX for urography. Every precaution known for obtaining a sterile fluid, completely free from foreign particles, is taken with this contrast medium during its production. And when NEO-IOPAX is ampuled it must pass before a corps of specially trained inspectors whose sole task is to detect and reject any solution containing the least visible trace of extraneous matter.

A final inspection by the physician himself before intravenous or retrograde injection is invited by the water-clear glass ampule in which NEO-IOPAX is dispensed.

NEO-IOPAX, disodium N-methyl-3,5-diiodo-chelidamate, is supplied as a stable, crystal-clear solution in 50 and 75 per cent concentrations.

Trade-Mark NEO-IOPAX-Reg. U. S. Pat. Off.

BAXTER'S complete line of parenteral equipment now includes both expendable and nonexpendable administration sets — offering you and your hospital a wide range of choice in selecting equipment best adapted to your particular requirements.

The expendable sets are discarded after onetime use, thus ending cleaning problems and reaction worries. They are especially desirable for administering solutions of high protein content, such as hydrolyzates, and for blood, plasma, or serum.

BAXTER ADMINISTRATION SETS FOR ONE-TIME USE...

The No. V-10 VACOSET

For infusions in which no drip is desired, or in which non-expendable drip is supplied by user. Set consists of: Five feet of speciallyselected transparent plastic tubing; glass needle adapter, aluminum connector. Ends of set separately sealed to prevent contamination. Supplied sterile and non-pyrogenic, ready for use. Catalog number V-10.

The No. V-14 VACOSET

A complete administration set; simply attach needle and shut-off clamp and proceed with infusion. Set consists of: Five feet of speciallyselected transparent plastic tubing, glass needle adapter, ExpenDrip (expendable sight-gauge), aluminum connector. Ends of set separately sealed to prevent contamination. Supplied sterile, non-pyrogenic—ready for use. Catalog number V-14.

MULTIPLE-YEAR SUBSCRIPTION PLAN FOR MOSBY JOURNALS

To present any prospective subscribers to Mosby Journals, we offer the special saving rates listed below on two, three, four, and five year subscriptions. These multiple-year rates are valid in California only.

Regular \$10.00 per year journals

- SURGERY—an independent journal devoted to the art and science of surgery, bringing expert description and analysis of the field. Monthly.
- AMERICAN HEART JOURNAL—a textbook on the heart which never grows old; represents the American Heart Association. Monthly.
- AMERICAN JOURNAL OF OBSTETRICS AND GYNE-COLOGY—the only journal devoted exclusively to these two related subjects; authoritative and complete. Monthly.

Regular \$8.50 per year journals

- JOURNAL OF LABORATORY AND CLINICAL MEDI-CINE—these twelve issues bring you full information on diagnosis and therapy, disease prevention and control, and new laboratory tests. Monthly.
- JOURNAL OF PEDIATRICS—official organ for The American Academy of Pediatrics, offering original contributions, Academy proceedings and abstracts. Monthly.

Regular \$7.50 per year journals

- JOURNAL OF THORACIC SURGERY—presents the subject by the "case method," giving full particulars on diagnosis, technique and management. Bi-Monthly.
- JOURNAL OF ALLERGY—adequate, current coverage of this important subject is only to be found in this excellent journal. Bi-Monthly.
- AMERICAN JOURNAL OF SYPHILIS, GONORRHEA AND VENEREAL DISEASES—outstanding contributors offer most dependable methods of diagnosis and treatment devised in their constant study. Bi-Monthly.

Why Days...

WHEN HOURS WILL SUFFICE

THE overwhelming discomfort of congestive heart failure and the progressive character of the syndrome demand prompt restoration of cardiovascular dynamics. Orally administered Digitaline Nativelle—the chief active glycoside of Digitalis purpurea—produces initial digitalization in but 6 to 10 hours, instead of days. Digitaline Nativelle, the original digitoxin, also offers these advantages:

- Virtual freedom from locally induced nausea and vomiting.
- Uniformity of potency—dosage calculated on basis of weight of drug.
- Rapid and complete absorption direct from the stomach; intravenous dose identical with oral.
- Free from the inert dross of whole leaf digitalis.
- Average digitalizing dose, 1.2 mg.; maintenance dose, from 0.1 mg. to 0.2 mg. daily.

Physicians are invited to send for complimentary copy of the brochure "Management of the Failing Heart," and a clinical test sample of Digitaline Nativelle sufficient to digitalize one patient.

THE DOCTOR hit it right on the button!

- ▶ In choosing the *complete* kind of malpractice insurance and service (the Medical Protective kind), he bought protection against *any* malpractice charge, however serious, that might be made by rich man, poor man, beggarman or thief.
- ▶ He has spared himself loss of time, money and reputation—and all the grief which will now be borne solely by the world's largest legal staff of malpractice experts.
- ▶ Not only will their confidential service assure him of prompt and unhurried attention to his best interests in prevention of suits, but they will cooperate with legal counsel (whom the doctor helps choose) in fighting any and all suits through the court of last resort.
- ▶ All cost of defense is paid by us. We also pay the judgment, if awarded, as provided in our policy. Yet our annual premium is about the cost of a good hat.

Reasons why all #hree 4

prefer BAKER'S MODIFIED MILK for the bottle-fed infant...

THE PHYSICIAN who has had experience with Baker's Modified Milk finds that in most cases this completely prepared infant food satisfies all requirements, from birth to the end of the bottle-feeding period. No change of formula is required—just increase the quantity—as the baby grows older.

THE HOSPITAL NURSE is pleased when the doctor prescribes Baker's Modified Milk because Baker's is simple to prepare for feeding—just dilute with water, previously boiled.

THE MOTHER is delighted because Baker's Modified Milk reduces the possibility of error . . . can be fed by anyone capable of adding the right quantity of water . . . and because Baker's, in powder form, is so convenient to use when she takes baby away from home.

AND THE BABY shows appreciation in the form of steady growth and health.

- Baker's Modified Milk is a completely prepared food that closely conforms to human milk in nutritional results . . .
- . . . is well tolerated by both premature and full-term infants . . .
- . . . may be used either complemental to or entirely in place of human milk . . .
- ... is helpful in correcting regurgitation, constipation, loose or too-frequent stools . . .
- . . . is advertised only to the medical profession.

Just leave instructions at the hospital. The obstetrical supervisor will be glad to put your next bottle-fed infant on Baker's Modified Milk.

POWDER

Start with either and change from one to the other, to suit individual requirements. Powder form is especially convenient when traveling.

LIQUID

 Baker's Modified Milk is made from tuberculin-tested cows' milk in which most of the fat has been replaced by animal and vegetable oils with the addition of lactose, dextrose, gelatin, iron ammonium citrate, vitamins A, B1 and D. Not less than 400 units of vitamin D per quart.

Complete information and samples gladly sent to physicians on request

Men and Amino Acids

Max Bergmann may be said to have inherited the mantle of Emil Fischer, whose principal collaborator he was at the time of the latter's death in 1919. He became Director of the Kaiser Wilhelm Institut für Lederforschung and, later, Member of the Rockefeller Institute for Medical Research. In 1925 he identified the dehydropeptides, substances of physiological interest which serve as substrates for a highly specific enzyme system. His "carbobenzoxy method", announced in 1932, provided a new, elegant technique for the synthesis of peptides. This led to the proposal of a system for step-by-step degradation of polypeptides, permitting successive removal and identification of individual amino acids. His investigations on protein structure and the specificity of proteolytic enzymes fostered the development of finer, more precise methods of amino acid analysis. Bergmann's more than 300 published papers contributed brilliantly to modern protein and carbohydrate chemistry, which are part of the foundation on which medical science rests.

- 1 Evidence obtained by direct color photography shows that "RAMSES" Vaginal Jelly forms an occlusive film over the cervical os which remains for as long as ten hours postcoitus.
- Clinical tests conducted by a prominent research organization establish its effectiveness; also that it may be used continuously without untoward effect.
- An independent accredited laboratory, after comprehensive testing, reports that it is rapidly spermatocidal and totally free of toxic or irritating properties.
- "RAMSES" Vaginal Jelly is offered for use under the guidance of physicians. It is supplied to patients through prescription pharmacies in packages containing a large tube of jelly with applicator at \$1.25. Refills without applicator \$1.00.

Physicians interested in obtaining complete information on conception control are invited to write for our revised Physicians' Manual.

LIVERMORE SANITARIUM

- The Hydropathic Department devoted to the treatment of general diseases, excluding surgical and acute infectious cases. Special attention given functional and organic nervous diseases. A well equipped clinical laboratory and modern X-ray Department are in use for diagnosis.
- The Cottage Department (for mental patients) has its own facilities for hydropathic and other treatments. It consists of small cottages with homelike surroundings, permitting the segregation of patients in accordance with the type of psychosis. Also bungalows for individual patients, offering the highest class of accommodations with privacy and comfort.

GENERAL FEATURES

- Climatic advantages not excelled in United States. Beautiful grounds and attractive surrounding country.
 Indoor and outdoor gymnastics under the charge of an athletic director. An excellent Occupational Department.
 A resident medical staff. A large and well-trained nursing staff so that each patient is given eareful individual attention.
 - Information and circulars upon request.

*oday's newly diagnosed diabetic can live a near-normal life. Most mild or moderately severe cases can be controlled with one daily injection of 'Wellcome' Globin Insulin with Zinc, which also allows a higher carbohydrate intake more nearly normal. The intermediate action of Globin Insulin closely parallels physiologic needs; maximum activity occurs when the patient is awake and eating, but wanes to minimize nocturnal hypoglycemia.

INITIAL DOSAGE AND DIET: One-half hour before breakfast administer 2/3 units of Globin Insulin for every gram of sugar spilled in a 24-hour urine specimen. Or start with 15 units of Globin Insulin and increase dosage every few days.

Divide the total carbohydrate allowance (140 to 240 gms.) as 1/5 breakfast, 2/5 lunch and 2/5 supper. (The total 4/5 lunch-supper allowance may be apportioned to fit the patient's requirements.) Midafternoon hypoglycemia may usually be offset by 10 to 20 gms. of carbohydrate between 3 and 4 p.m.

FINAL ADJUSTMENT: Both diet and dosage must be adjusted subsequently to meet the individual needs. Final carbohydrate distribution may be based on fractional urinalyses. Globin Insulin dosage is adjusted to provide 24-hour control as evidenced by a fasting blood sugar level of less than 150 mgm., or sugar-free urine in fasting sample.

'Wellcome' Globin Insulin with Zinc is a clear solution, comparable to regular insulin in its freedom from allergenic properties. Available in 40 and 80 units per cc., vials of 10 cc. Accepted by the Council on Pharmacy and Chemistry, American Medical Association. Developed in The Wellcome Research Laboratories, Tuckahoe, New York. U.S. Patent No 2,161,198, LITERATURE ON REQUEST.

'Wellcome' Trademark Registered

BURROUGHS WELLCOME & CO. (U.S.A.) INC., 9 & II EAST 41ST STREET, NEW YORK 17, N.Y.

rendezvous with Rhus

From early spring until late fall when poison ivy and poison oak threaten your patients, you will have a continual rendezvous with Rhus dermatitis. In the majority of instances, prophylactic inoculation with 'Ivyol' Poison Ivy Extract is remarkably successful in minimizing ivy or oak poisoning. "Ivyol' Extract contains the purified principle of poison ivy (1:1000) in sterile olive oil. Administration by intramuscular injection is relatively painless because of the bland character of the vehicle employed. "Ivyol' Extract is a development of the Medical Research Division of Sharp & Dohme. It is accepted by the Council on Pharmacy and Chemistry of the American Medical Association. Supplied in packages containing one or four 0.5-cc vials, each vial representing a single dose. Sharp & Dohme, Philadelphia 1, Pa.

Prophylaxis: Contents of one vial, intramuscularly, each week for four weeks.

For the Prophylaxis of Poison Ivy and Poison Oak Dermatitis
